

Paper Treatments - Mending Broken Boards - Part II

Treatment of MC# 05-1048 - MGM Movie Matte 044:

The board on which this MGM Movie Matte drawing was mounted was broken or split at a point along the left edge about half-way up. (See detail photo) This broken place is much more visible in the second "Before Treatment" photo, which was too light, but is included because the split is easier to see. In this mending treatment, the board was repaired which reduced the visual disturbance from the broken board.

Before treatment (board is broken on left edge about half way up)
